> Since sets are unordered, your program may print out the movies in a different order than mine. That's fine. Your program should, however, print the *same* movies in each collection as mine does.

I got a new movie! It's Star Wars: Episode LXV (2091).
I'm going to let my friend borrow it.
My friend realized that Paul Blart: Mall Cop (2009) is not a good movie.
